

JAWS[®]

Just Add Water System

...THE JUST-ADD-WATER-SYSTEM THAT DELIVERS THE POWER OF CLEAN RIGHT AT THE FAUCET

No special equipment necessary. Your portable JAWS[®] portion pouch automatically delivers the precise amount of concentrate...offering greater convenience and accuracy than today's expensive mechanical dilution devices... far more economical than the "glug-glug" method.

Fill your work bucket with water, tear open the JAWS[®] portion pouch and pour the entire contents of portion pouch into your bucket, allowing the release of pre-measured concentrate into solution.

Saves Space, Time, & Money

...Safely.
