

## Health Care Cleaning & Sanitation Procedures Module

### Waste Removal <sup>2</sup>

- A. Materials Requirement Planning (MRP)
  - a. Trash truck
  - b. Plastic liners
  - c. Disposable gloves

### Waste removal cleaning steps

#### B. Step 1 - Accumulation

- 1) Personnel on each unit or floor should transport bagged materials to designated accumulation point. "Sharps" must be collected in approved containers only. Maintain proper procedure to isolate infectious materials.

#### C. Step 2 - Transportation to disposal area

- 1) Collection time and schedule are dependent on various departments' requirements. Begin and move collected materials through halls and elevators when there is a minimum of traffic. Maintain proper procedures to isolate infectious material.
- 2) After materials are unloaded at disposal site, return cart to an appropriate area for immediate cleaning with a germicidal solution.
